GRP PERSONAL HEALTH ASSESSMENT [PHA]

Please enter your FIRST NAME + SURNAME →

This PHA is designed to elevate your awareness, bringing consciousness into the behaviours that impact your ongoing state of health with pinpoint precision. The process of considering and answering each section IS the tool for doing this. Get used to this, as it is CRUCIAL to you first attaining and then maintaining long-term sustainable health.

Evaluating and assessing your health in detail can be confronting, overwhelming as well as both exhilarating AND deflating. However, it is important to always see this DEEP DIVE into your health as a POSITIVE experience, as it introduces you to a level of self-care you have likely never experienced before. While we do NOT encourage you to equate yourself or your body with a machine, think for a moment here of the benefits of having your car regularly serviced. Doing that allows you to determine what needs attention, rather than ignoring the symptoms that may become a serious problem if ignored, or worse… something that is too late to be remedied.

This practice of regular, thorough and detailed self-assessments (aka, "self-check-ins") is designed to keep your health in the forefront, as your priority. It represents an unparalleled opportunity to assess for yourself whether your wellbeing is improving or declining into areas of neglect. These insights provide the diagnostic input and motivation for timely, targeted action using your GRP toolkit.

The GRP uses a crucial baseline of anthropometric measures… Waist to Height Ratio, Body Mass Index, Waist Circumference, Middle Upper Arm Circumference (MUAC), Waist-Hip-Ratio and other measurements, along with QUANTITATIVE (i.e., RATINGS) and QUALITATIVE data (i.e., DESCRIPTION/EXPLANATION) as part of your toolkit to strategically assess the state of your Microbiome's health – which is also your health.

We HIGHLY recommend you take photos (front, side and back profile) to see the visual changes as your health improves, both for your own personal records and so you can see for yourself your own transformation as you take charge of your own health.

INSTRUCTIONS… Please read slowly and carefully

- **ELECTRONIC VERSION:** Download the free Adobe Reader app on your computer or device (without it the forms WILL NOT WORK). Then open this form again in the app to fill in, manage and save your data. Use the drop-down 'Ratings' menus, and type your responses into each of the coloured boxes you'll see in each row when it comes time to record your data there.
- **HAND-WRITTEN VERSION:** If you prefer to do so, please download and print the hand-written version of this document, to fill it in by hand.

HOW TO FILL IN… Read through the ENTIRE document first, then starting from the measurement section, fill following these instructions…**RATING** (Quantitative data) **INSTRUCTIONS…**

- Use the drop-down menu provided to select a rating in each section where used.

DESCRIPTION/EXPLANATION (Qualitative data) **INSTRUCTIONS …**

- Avoid one-word OR short phrases. Be REALLY specific with your description/explanation. Give yourself the benefit of the time you deserve to deep dive and really feel and describe your experience.
- You are describing/explaining your condition NOW. NOT what it used to be, nor what you want it to be. It is NOT a medical history. You are writing about what you're experiencing in EVERY area at the moment, NOT JUST filling in what is happening on the day you fill it in.
- When you update your PHA, please use these EXACT SAME instructions herein. Do NOT use general statements e.g., "Improved significantly" or "Same as above" or "less than before" "no change" "as before" etc. Take this opportunity to REALLY reflect and investigate EVERY aspect of your health and take this opportunity to deeply engage with and gauge where your health is at.

GRP PERSONAL HEALTH ASSESSMENT [PHA]

EXAMPLE of how your ratings, descriptions/explanations may look…

0 = Always (100% of the time)	**1** = Often (90% of the time)	**2** = Usually (70% of the time)	**3** = Sometimes (50% of the time)	**4** = Hardly ever (10% of the time)	**5** = Never (0%)

BODY… ACHES, PAINS OR SPASMS	**RATING**	**DESCRIPTION/EXPLANATION**
START	0	I get lower back pain just above the buttocks on both sides every day. On waking I have moderate (5 out of 10) pain, and it's difficult to stand straight and get moving. By late afternoon, the pain becomes more intense. I am unable to do many activities I use to enjoy like hiking. Mentally, it is fatiguing & I get sad as it is omnipresent.
ESTABLISHMENT END	3	I have lower back pain only when I allow stress to get to me, a couple of times this month. When I experience it, it is a very mild ache that is resolved with Yin Yoga stretches, ginger tea etc. It doesn't stop me from doing any activities. I now see this 'pain' my body gently telling me what I need to be aware of.
GROWTH END	4	I experienced lower back pain just once. I can now move with ease. I can clearly see this happens when I allow myself to be lower on my ME totem pole. Going back to pleasing others first instead of myself.

GRP PERSONAL HEALTH ASSESSMENT [PHA]

MEASUREMENTS... Measure and weigh yourself at the same time of day, wearing no clothing using a stretch-resistant tape and the same set of scales.

- **Height:** You'll only be doing this once. Please have someone measure for you, do NOT estimate.
- **Weight:** Weigh yourself at the same time of day, with the same scales, wearing no clothes. ONLY weigh yourself at the END of a Phase and NO other time!!
- **Chest**: Measure around the largest part of your chest (breasts) with the tape across nipples.
- **Waist**: Measure approximately one inch above your belly button or at the narrowest part of your waist.
- **Hips:** Measure around the largest part of your buttocks with your heels together.
- **WHtR:** To calculate your WHtR, *right click* HERE and select 'Open Hyperlink' to open link. Calculate your WHtR as instructed.
- **BMI:** To calculate your BMI, *right click* HERE and select 'Open Hyperlink' to open link. Calculate your BMI as instructed.
- **Right Bicep**: (MUAC) Measure your right bicep (not left) midway between the top of your shoulder and elbow.
- **Left and Right Thigh**: Stand with your legs slightly apart, measure your upper thigh where the circumference is largest.

Waist to Height Ratio [WHtR] … is a tool for predicting cardiovascular, diabetes and stroke risk, hypertension, and dyslipidemia because it accounts for the distribution of abdominal fat, which is known to increase the aforementioned risks. The WHtR is a measure of fat distribution. A superior tool to detect cardiometabolic risk factors.

Extremely slim	Slim	Healthy	Overweight	Very overweight	Obese
≤ 0.34	0.35 – 0.41	0.42 – 0.48	0.49 – 0.53	0.54 – 0.57	≥ 0.58

Body Mass Index [BMI]... is a measure of 'size', relating to body fat, not dependent on your frame. Correlated with total body fat, it does not distinguish fat from muscle or different body fat distributions.

< 18.5	18.5 – 24.9	25 – 29.9	30 – 34.9	35 – 39.9	40+
Underweight	Healthy Range	Overweight	Obese, Class 1	Obese, Class 2	Obese, Class 3

Waist circumference... is an accurate measure of the distribution of body fat and has been shown to be more strongly associated with disease and/or medical condition and mortality.

Lowest risk	Increased risk of chronic disease	Higher increased risk of chronic disease
Less than 80cm (31.5")	Greater than 80cm (31.5")	Greater than 88cm (34.6")

SLEEP…

SLEEP DURATION	USUAL sleep time? *e.g., 10:00 – 10:30pm*	USUAL wake up time? *e.g., 6:30am*	Hours of sleep per night *e.g., 8-hrs*

BOWEL MOVEMENTS	MOVEMENTS PER DAY	DESCRIPTION/EXPLANATION
*In description/explanation you **MUST** refer to **...*** • ***Frequency...*** *What time(s) of day you pass a bowel movement? E.g., 9am and 1pm.* • ***Speed...*** *How long does it take to pass a bowel movement, from sitting on the toilet seat? 30-secs? 1-min? 5-mins?* • ***Colour...*** *What colour? E.g., Black, Brown, Red, Greenish, Orangish, Yellow'ish, Pale grey?* • ***Consistency...*** *Separate hard lumps like nuts? Sausage shaped but lumpy? Sausage like cracked surface? Smooth Sausage like? Soft blobs with clear cut edges? Fluffy with ragged edges/mushy? Watery, no solid pieces? Sticky/Greasy?* • ***Concurrent with ANY pain or discomfort*** *... if so, please describe.* • ***Odour...*** *No odour? Bad odour? Or smells like?* ***EXAMPLE****: I pass 2 bowel movements a day, around 7am soon after waking, before any food or drink. The other is about 30-mins after breakfast around 10am. The first one passes in less than 30-secs but the 10am one takes 3-4 mins to pass. The colour is light brown but once a week it is more yellow'ish. The consistency is soft blobs a little watery with about once a week being sticky/greasy and sticking to the side of the bowl. I have no pain or discomfort when passing. I would say 7 out of 10 times there is just a slight odour, but the other times it is quite a strong unpleasant odour.*

YOUR GOALS, YOUR WHY…

- GOALS are something you want to achieve; they are measurable and have an endpoint.
- WHYS are your motivations for wanting to accomplish a goal. They are the driving force that can outlast any challenge! WHYS are meaningful to YOU. NOT what someone else wants for you.

Here's an example of a **GOAL and WHYS…**

- MY GOAL IS… *to be pain free.*
- MY WHYS ARE…
  - *So, I can re-connect with my partner and go bushwalking together.*
  - *So, I can sleep soundly, uninterrupted by pain, so I can wake refreshed and hit my day running with vigour.*
  - *So, I can move freely to do all my daily activities (both work and leisure) with enthusiasm and ease.*

It is important **NOT** to use negative statements. Avoid saying what you DON'T want…
EXAMPLE: Don't say… "So, I don't have to worry about medications". Instead say… *"So, I can be free from taking medications and their side effects"*
EXAMPLE: Don't say… "So, I'm NOT overwhelmed by the things I have to do each day". Instead say… *"So, I have the space to enjoy life"*

Below… please list your **3 MAIN GOALS…** and come up with **3 STRONG WHYs** why accomplishing this is important to you. **You MUST have 3.** You are required to CHECK IN at the end of EVERY phase, and update on how much closer you are to your goal, so you can assess your progress.

ONE CONDITION: *You **CANNOT** refer to WEIGHT or BMI as one of your GOALS or refer to getting to a goal weight. Why? Because, focusing on WEIGHT or BMI, i.e., looking at a 'number on the scales', has nothing to do with building a consistent set of healthy behaviours and a healthy Gut Microbiome. Being healthier involves how you FEEL, how well you sleep, your energy levels, your mood, your ability to navigate life with ease, how you move your body effortlessly without aches and pains, how clearly you can think, how your body performs and SO much more.*
